BEYOND FIRE

CAPABILITY STATEMENT

Better with Beyond

BEYOND FIRE

At Beyond Fire, we protect what matters most.

We deliver expert fire protection with care, precision, and pride - going beyond expectations to create safer spaces and peace of mind.

OUR CAPABILITY

We offer comprehensive solutions to meet all your fire protection needs. We manage from the early concept stage to the detail design, supply, manufacture, install, commission, and ongoing services & maintenance of fire protection equipment and systems for sites of any size. Our reliable and cost-effective services ensure all your fire safety system requirements are covered.

Service & Maintenance

We deliver Service & Maintenance solutions in accordance with the compliant regulations and relevant Australian Standards for maintenance and testing of fire AS 1851.

FIND OUT MORE

Design, supply, construction and routine inspection of:

- Fire sprinkler systems
- Fire detection systems
- Building occupant warning system
- MASD systems
- Gaseous and watermist suppression systems
- Emergency warning and intercommunication systems (EWIS)
- Fire doors
- Fire hose reels
- Fire hydrants
- Water tanks
- Penetration smoke and fire sealing
- Emergency and exit lighting
- Fire shutters and fire curtains
- Fire extinguishers

We also offer:

- Essential fire safety measures compliance audits & reporting
- In-house delivery of annual fire safety statements – accredited practitioner fire safety
- 24/7 Reactive maintenance
- Delivery of minor, major design and construction projects of the above systems, including reconfigurations and upgrades

Design & Construction

We deliver tailored fire protection solutions that integrate seamlessly across every stage of your project, from concept and design to construction and commissioning. Our expert team plans and executes every detail with precision, ensuring reliable, compliant, and cost-effective systems built to last.

FIND OUT MORE

Fire Suppression Solutions:

- Fire sprinklers
- Window drenchers
- Combined fire sprinkler / hydrant systems
- Fire hydrants
- Fire hose reels
- Fire pumps & water storage tanks
- Portable fire extinguishers

Fire Detection Equipment & Services:

- Fire detection and alarm systems
- Emergency warning and intercom system (EWIS)
- Fire indicator panels
- Emergency control panels
- Emergency and exit lighting

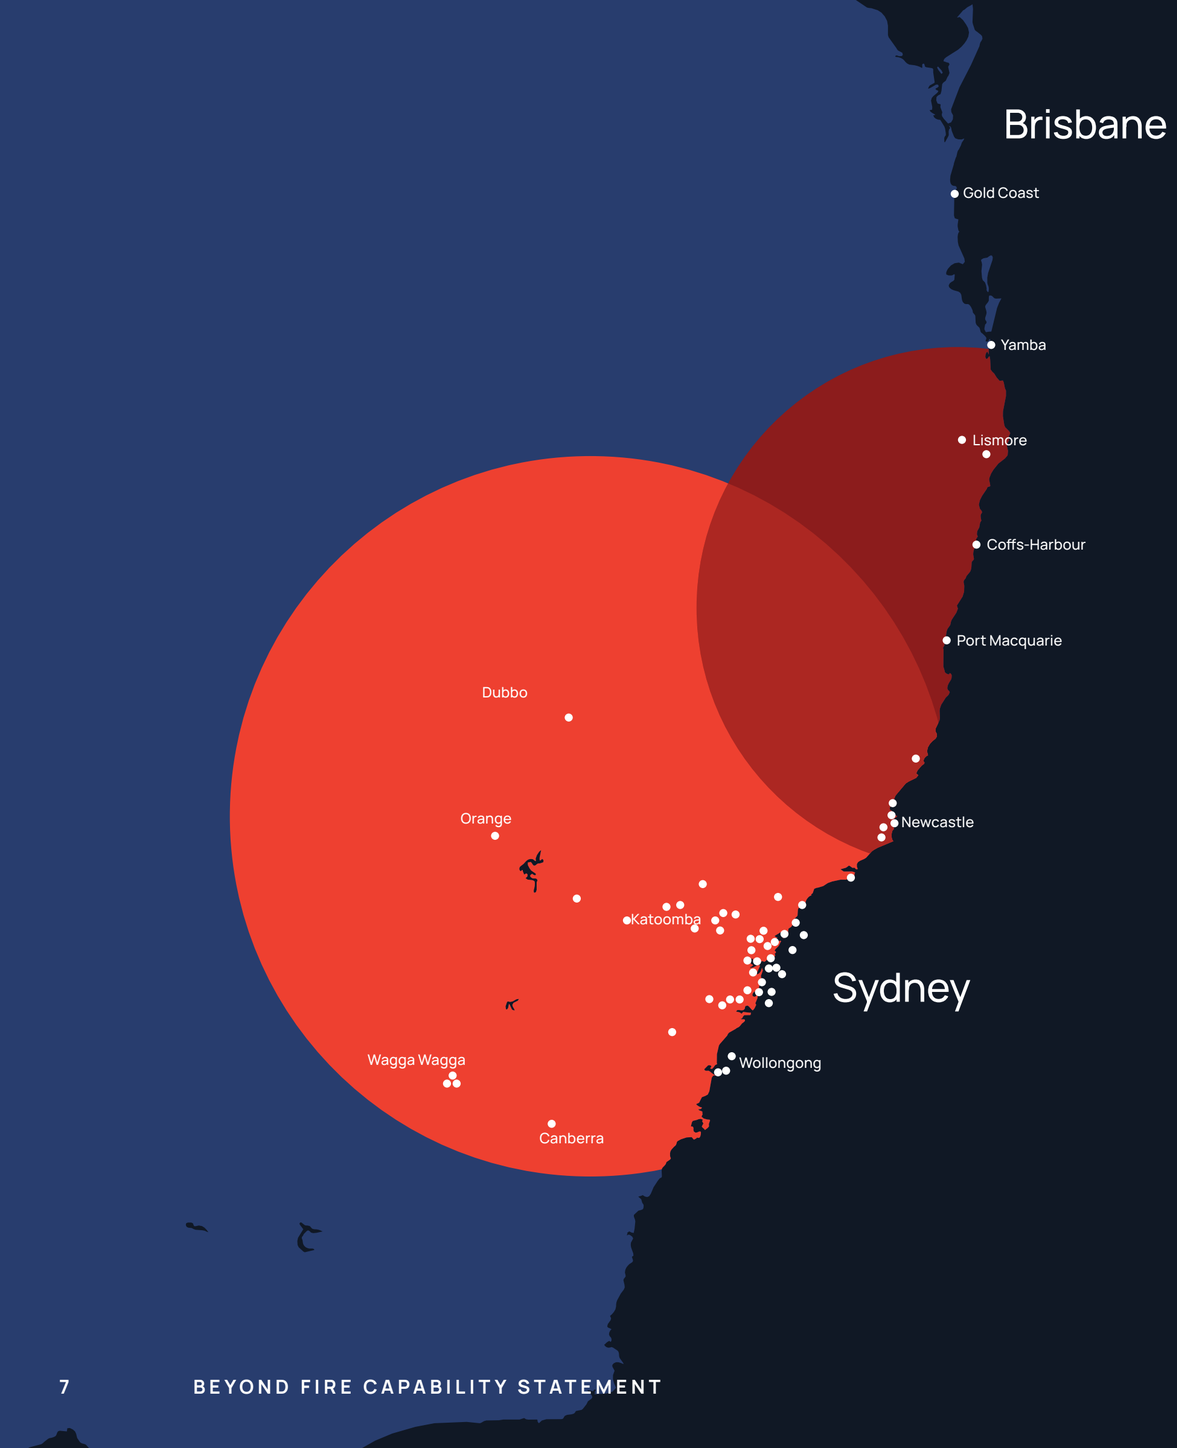
Special Hazard Solutions:

- Pre-action systems
- Deluge system
- Watermist system
- Gaseous suppression systems
- Kitchen fire suppression systems
- Aspirating smoke detection (VESDA)
- Flame detection
- Off gas detection systems

Industries we specialise in

For the past 10 years, we've proudly supported a diverse range of industries, delivering tailored fire protection solutions that meet the unique needs of each sector. Our experience spans across various fields, ensuring that every site & project benefits from our deep expertise and commitment to safety.

- Educational Facilities
- Property Developments
- Data Centres
- Renewable Energy Facilities
- Public Facilities
- Offices & Retail



Our Coverage

Beyond Fire can provide a wide range of services throughout New South Wales and are slowly expanding our coverage, with our current geographical footprint depicted:

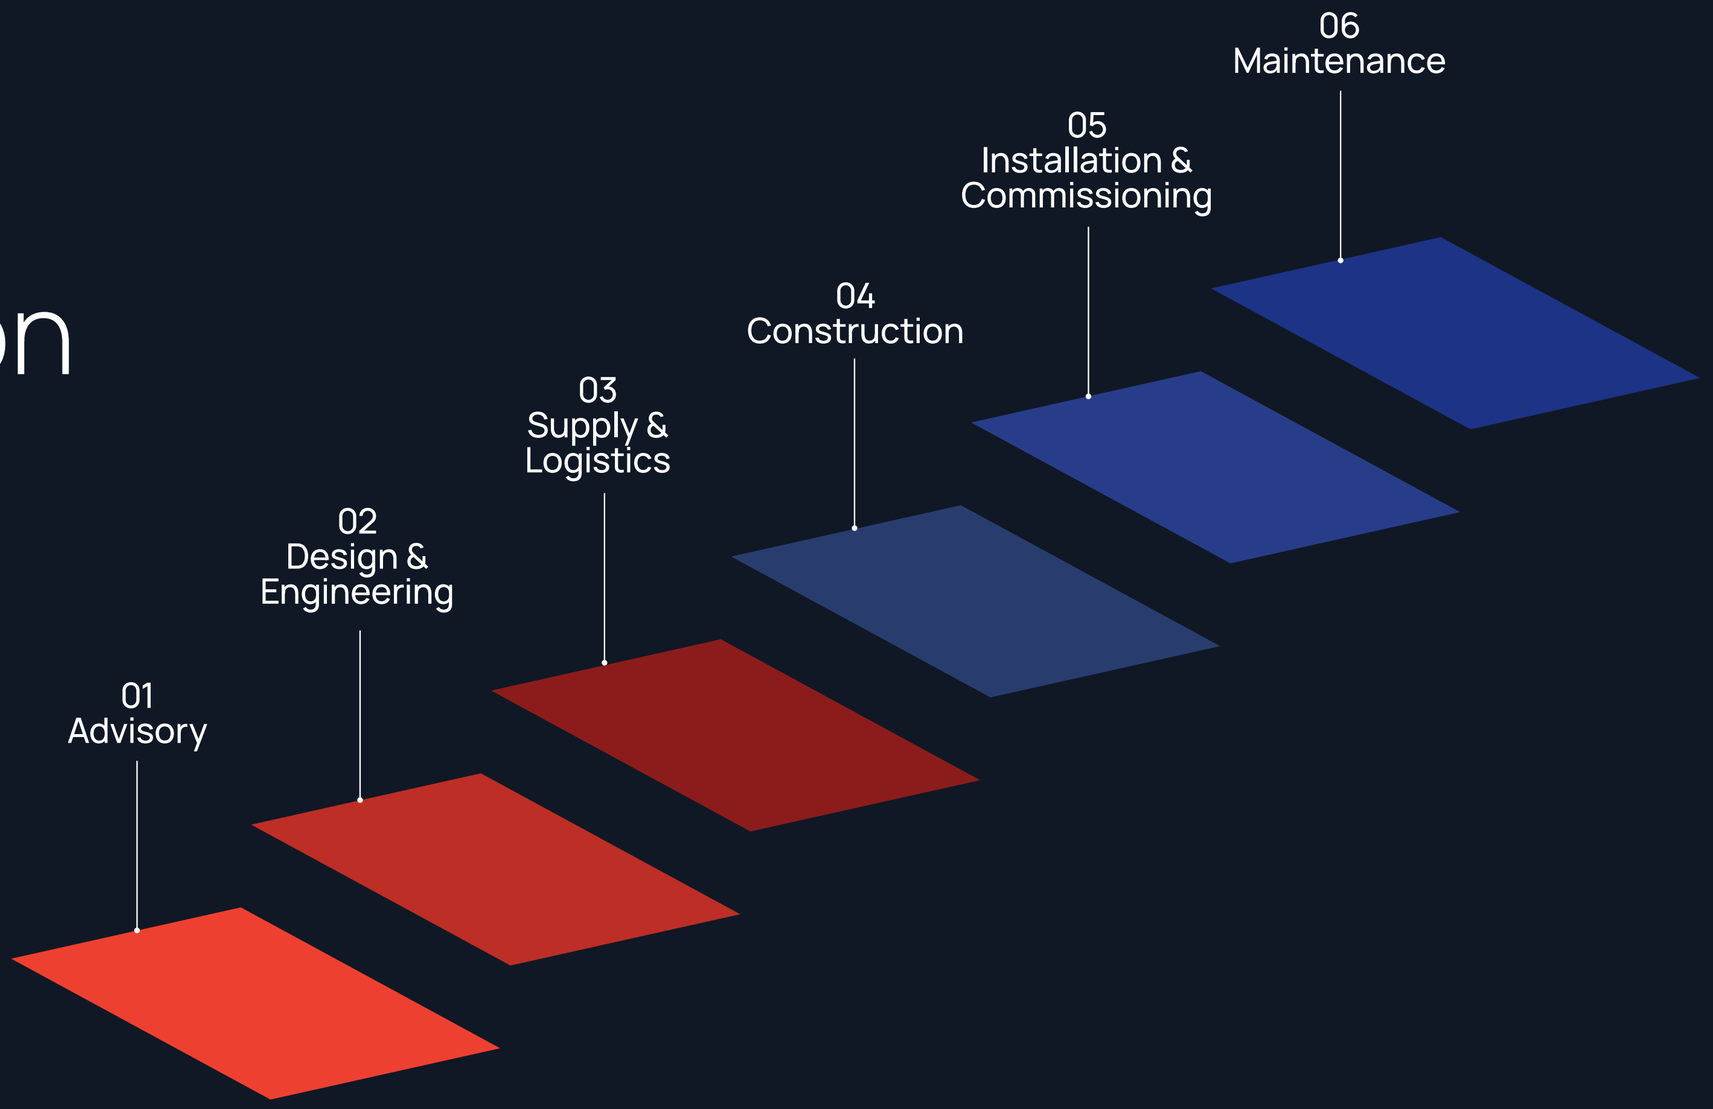
We have successfully delivered fire protection solutions across NSW and ACT, covering a wide range of environments including commercial buildings, high-rise and low-rise buildings, hospitals, hotels, aged care facilities, childcare centres, schools, universities, retail stores and shopping centres, sporting complexes and facilities, data centres, metro stations, electrical infrastructure, battery energy storage systems, self storage facilities and more.

SEE CASE STUDIES

TURNKEY SOLUTIONS

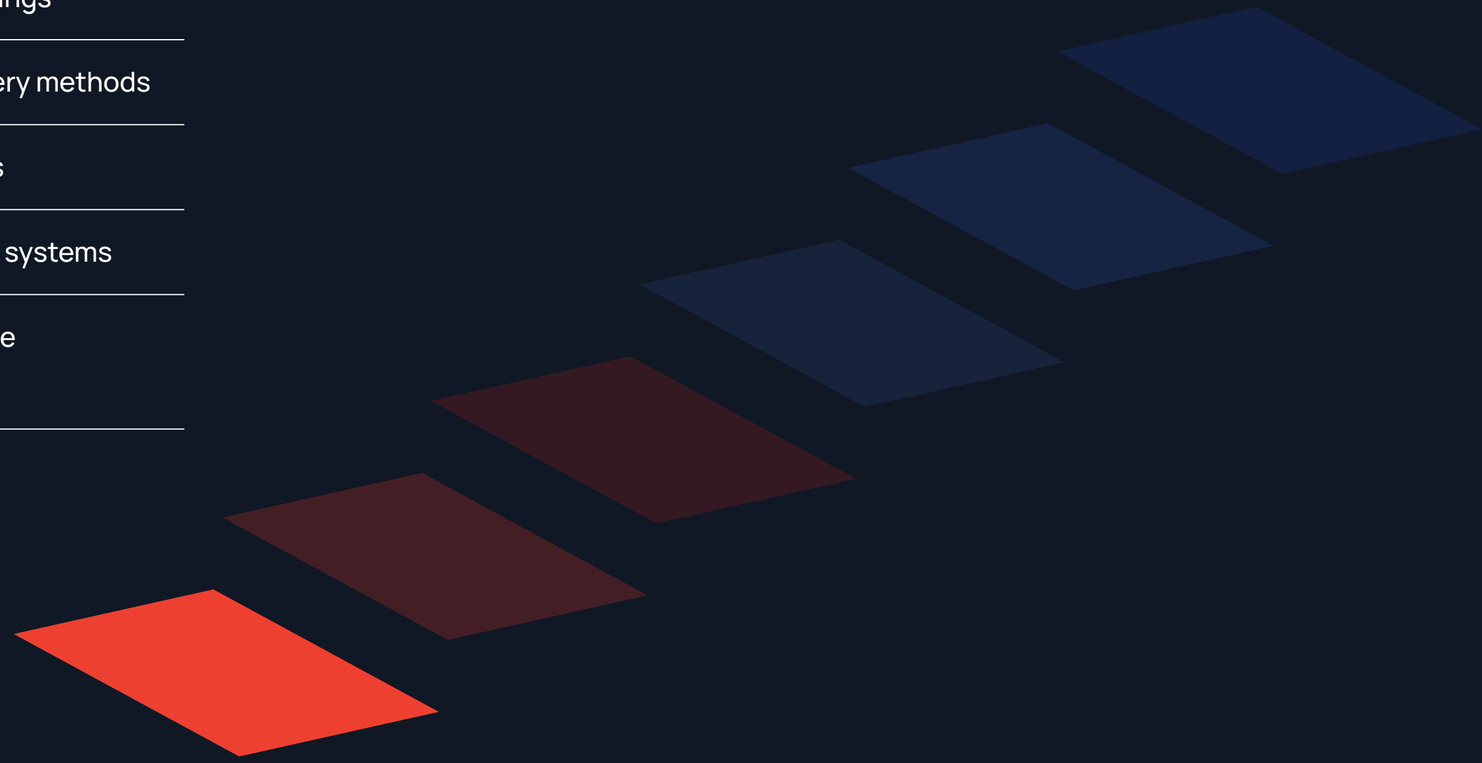
Full Service Fire Protection

Providing comprehensive end-to-end specialist fire protection services to the construction and commercial industries, our solutions are guided by a six-step asset lifecycle approach with a focus on quality, performance, efficiency and ultimately the end-user experience.



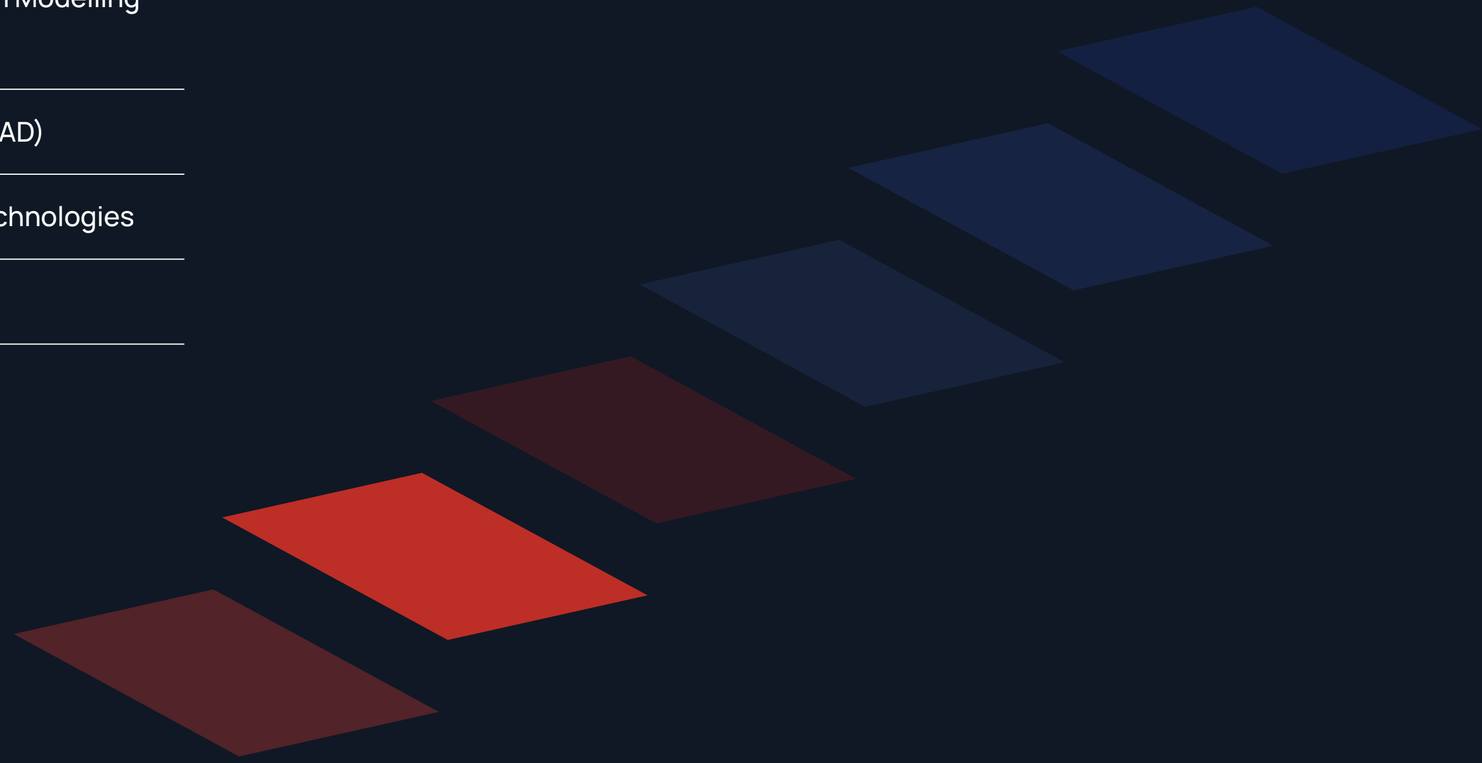
01 Advisory

- Design and compliance assessment
- Site/system audits and surveys
- Feasibility studies
- System optimisation
- Project planning and value management
- Asset lifecycle cost modellings
- Alternate design and delivery methods
- Outsourcing arrangements
- Technology and Innovative systems
- Preventative and Corrective Maintenance



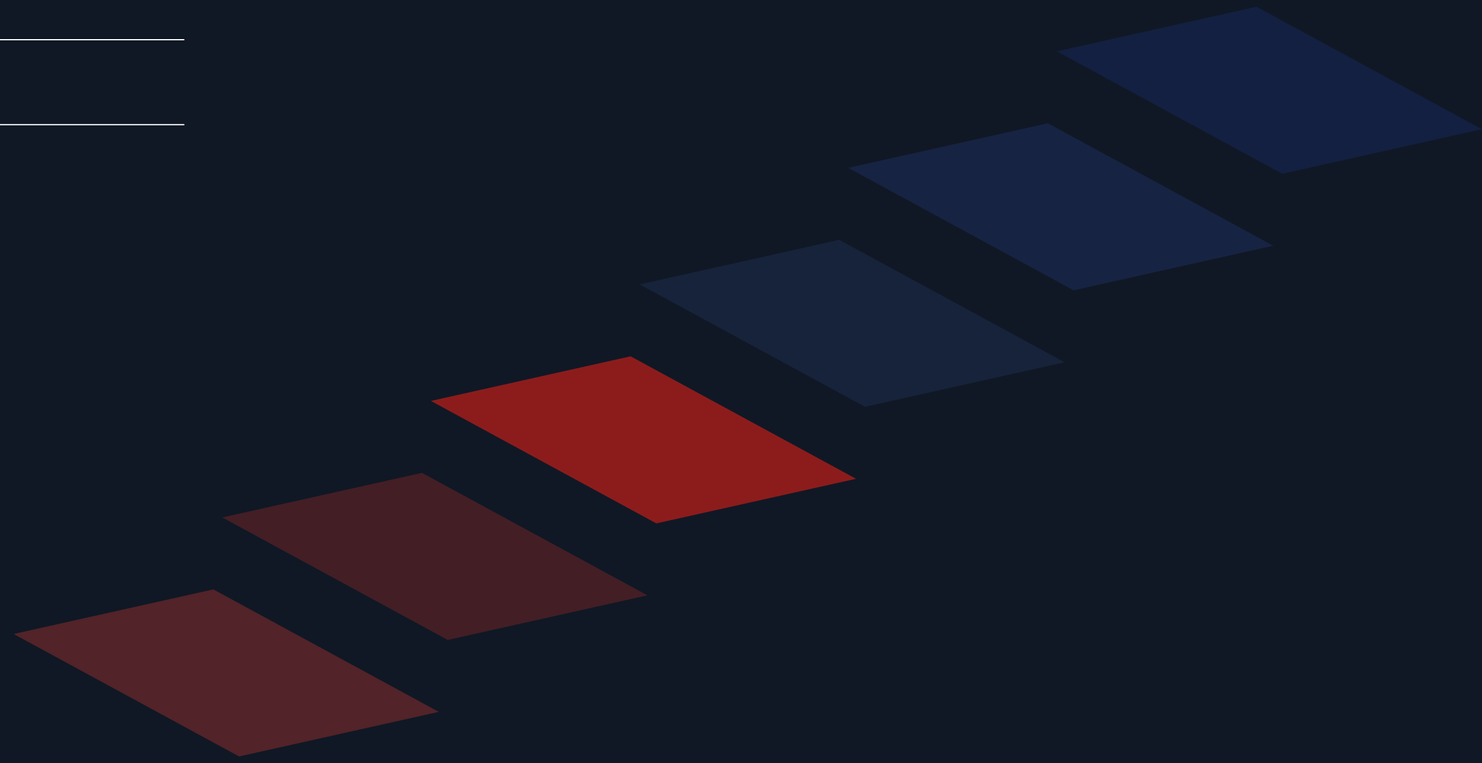
02 Design & Engineering

- Detailed system design
- Design validation
- Construction cost estimating
- Engineering and drafting
- Prefabrication/modularising workflows
- 3D and Building Information Modelling (BIM)
- Computer-aided design (CAD)
- Design and engineering technologies
- Design certification



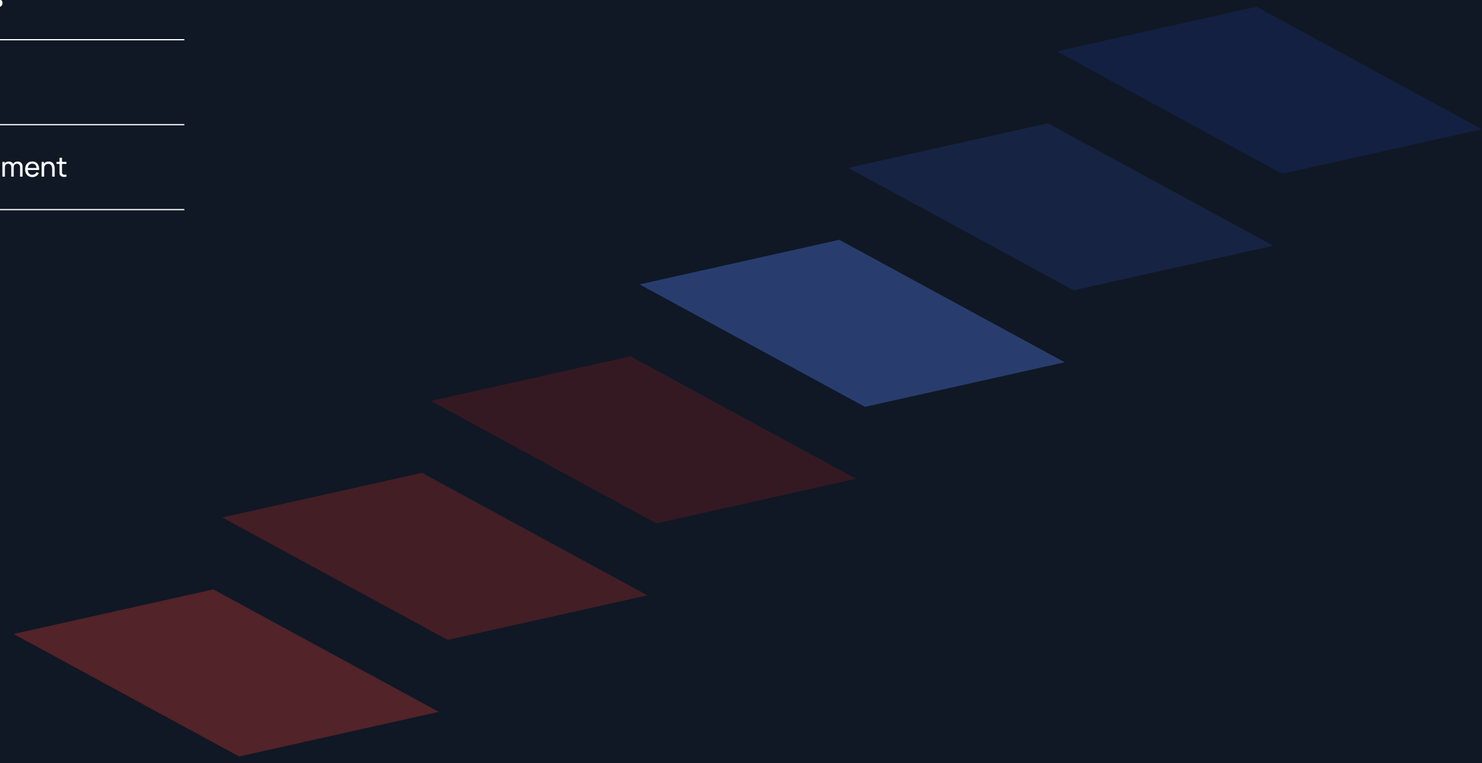
03 Supply & Logistics

- Materials and equipment sourcing
- Responsible procurement
- Manufacturing and fabrication
- Warehousing and logistics
- Materials delivery staging
- Prefabrication
- Inventory tracking



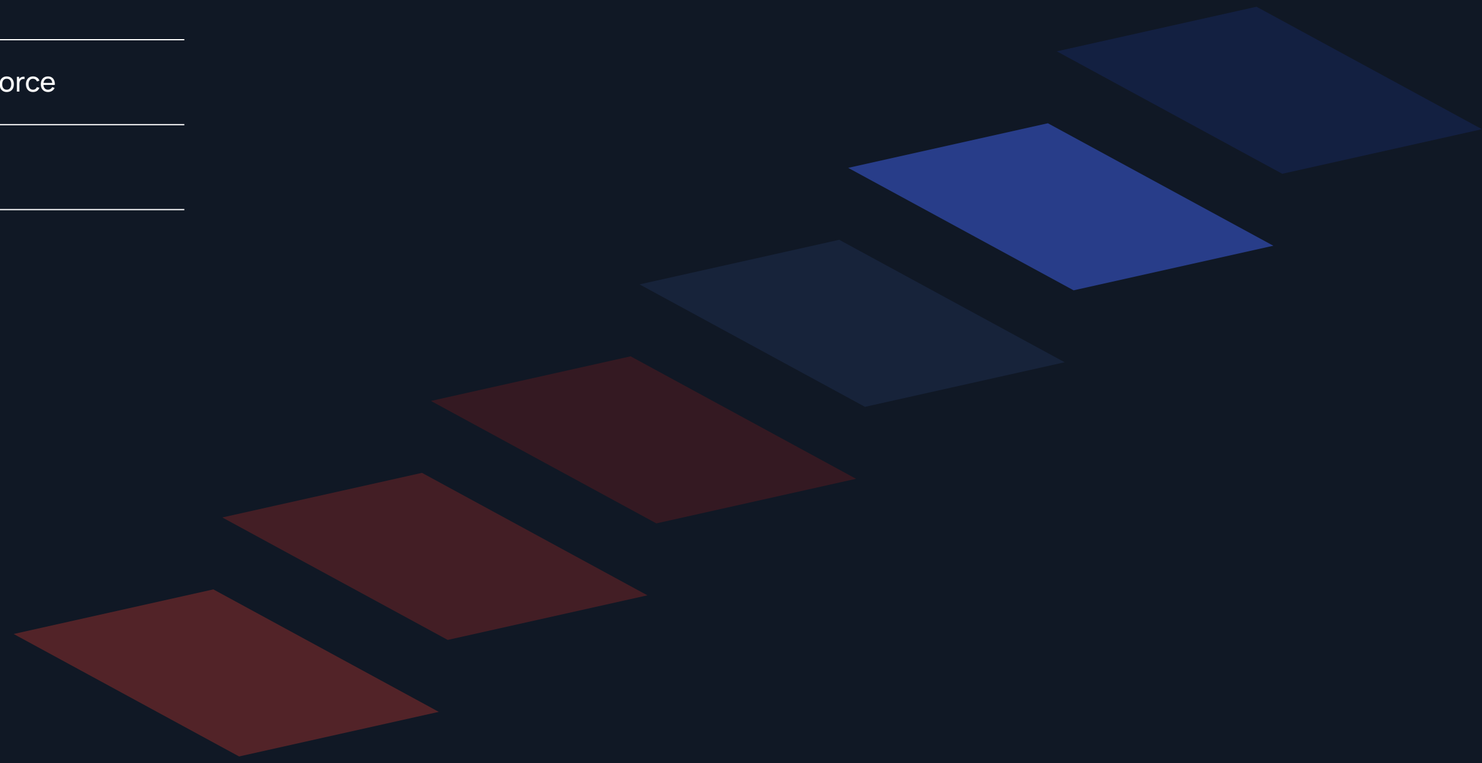
04 Construction

- Building and construction
- Refurbishment, extension and augmentation
- Project management and supervision
- Scheduling and planning
- Integration and co-ordination
- Construction technologies
- Materials management
- Construction cost management



05 Installation & Commissioning

- New Installations
- System expansions, retrofits and upgrades
- Commissioning, training and documentation
- Sub-contractor management
- Testing and reporting
- Procedures
- License and ticketed workforce
- Installation certification



06 Maintenance

- Programmed and preventive maintenance
- Reactive/corrective services
- Equipment lifecycle management
- Asset auditing and serialisation
- Asset data management
- Predictive analysis
- Maintenance technologies and software
